

QUALITY AND ENVIRONMENTAL POLICY

*REGFILTER is a company that designs, manufactures and markets an exclusive solution for **the filtration of large volumes of water** in artificial environments.*

We are committed to protecting the environment and preventing pollution by incorporating criteria in the design of our products that minimize energy and water consumption, as well as chemical products and the associated generation of waste, during the useful life of our equipment.

We carry out our activity under the commitment to comply with legal, customer and other requirements, always seeking the continuous improvement of our products and processes to achieve maximum customer satisfaction.

Our strategic policy is developed taking into account the principles and values reflected in this policy, providing the framework for setting periodic improvement objectives that allow the sustainable and sustained growth of the company.
